## **TWO INET IT ASSESSORS CERTIFIED BY MISA**

(Skopje, 14.08.2012) – Two INet assessors in the field of Information Technologies have been awarded with training Certificates and with Convictions for passing the exam. The certificates were issued by the Minister of Information Society and Administration (MISA) of the Republic of Macedonia ([www.mio.gov.mk](http://www.mio.gov.mk)).

Twenty candidates attended the training in May 2012. In July, the first professional exam has been conducted, and two INet professionals that have successfully passed the course and exam for assessors in the field of information technologies are:

- Toni Petreski, CEO
- Aspasija Tasevska, Financial Specialist

The IT assessors are familiar with the law, they have skills for identifying the purpose, subject and scope of the IT assessment, and they have knowledge for identifying and separating IT assets by category to choose appropriate method of assessment. According to the purpose and scope of the IT assessment, the IT assessors apply appropriate approaches and methods of the IT assessment, and prepare a proper IT Assessment Report.

Assessments for the Information Technology in the future will be used for certain transactions, such as purchases and sales, liquidation, bankruptcy and enforcement procedures, and will be used by the entities with a need to deposit their assets when starting or expanding their business.
